

Hosted Exchange

A more flexible solution for email on the move...

Ideal for multiple sites

Available from £3.99 per month

Access Email from anywhere

Share calendars, contacts and tasks

Reduces email downtime

Dedicated exchange server

While most businesses have now adopted Microsoft Exchange as their email service. Many find themselves trapped within the confines of continual hardware replacement... There is a better way...

Both Single and Multi-site organisations can reduce costs and improve performance by implementing hosted exchange which is centrally managed from within our own private data centre. This flexible solution requires no upfront investment and reduces the reliance on poor ADSL upload speeds.

Hosted Exchange

Why Hosted Exchange

Hosted V's On Site Exchange

Switching from an in-house solution is certainly a lot easier than you may think. At OOSHA, we do the switch for you, with no interruptions or loss of data and before you know it, you'll be up and running with the following benefits compared to having your own in-house solution:

- **No up front investment** – Pay as your business grows on a monthly basis
- **Increased access speeds** – Access your mail through the fast connection into our data centre rather than the single broadband connection into your head office.
- **Reduced down time with hosted exchange** – If your internet connection goes down at your head office then remote sites and workers cannot access email
- **Enhanced security** - Your hosted exchange will benefit from the latest technology firewalls and be housed within our own secure data centre.
- **Improved Flexibility** - Increased availability and performance through broadband access.
- **Access Anywhere** - Accessibility over the public Internet allows secure access for both internal and external scenarios
- **Simplified Technology** - No requirement for complex VPN or Internet/Intranet solutions.
- **Hassle-Free** - No need to worry about security patches, software updates, upgrades, monitoring, repairing failed hardware or adding additional capacity
- **Daily Backups/Disaster Recovery** - Stored off-site, ensuring business continuity and disaster recovery capabilities.

Did you know?...

Hosted Exchange shows cost savings in many ways

You will no longer have to invest in under-utilised and expensive hardware. Add to this the savings on IT support and the potential for loss of revenue from downtime as well as the ongoing headaches of management and you can see that our cloud solutions are right for you!
